

Impulse indicator for MetaTrader 4

User documentation

January 2017

English version.

Documentation version 1.0.

This documentation is provided with the Impulse indicator at the time of purchase.

The right of the author to be identified as author of his work has been asserted by him in accordance with the Copyright, Designs and Patents Act 1988.

All rights reserved; this work may not be reproduced, stored in a retrieval system, or transmitted in any form or by any means, electronic, mechanical or otherwise without the prior written permission of the author.

Disclaimer

Thank you for purchasing the Impulse indicator. Before you rush to open your platform, to attach the indicator and start analysing or trading, please read this disclaimer.

The artefacts and their documentation are not intended to form part of any financial advice.

Trading and speculation are highly risky activities, they are no simple games and involve the trader's money.

To enter an entirely unstable and limitless world, you need to be your own master.

The artefacts you have purchased are intended to help you analyse markets and instruments. It can also be introduced in a trading system. However, developing a system and a trading plan need to remain completely outside the immediate application of the purchased artefacts.

Managing risk and managing money every day is even more than designing a system and a plan.
